PROFILE

Flutter Developer with proven experience in building and deploying **cross-platform mobile and web applications** across domains such as aviation, sales automation, media tools, and social media. Originally began my career as an **automobile mechanic (2018–2021)**, during which I self-taught mobile app development, built a **demo Android training app (Java)** that was featured in the **Kuttukaran Group newsletter**, and went on to release my first Play Store app (*G-Form Tools*, 230k+ installs). Since then, I have developed multiple apps with **tens of thousands of downloads**, gaining expertise in **Flutter, Dart, Firebase, REST API integration, Riverpod/GetX state management, and native Android (Java)**. Recognized for delivering **scalable, user-focused solutions** with strong problem-solving, adaptability, and end-to-end development skills.

RELEVANT EXPERIENCE

Flutter Developer <i>Brooklet Systems Pvt. Ltd</i>	Sep 2024 – present Trivandrum, India(WFH)
- Developed and maintained cross-platform mobile applications using Flutter and Dart, ensuring smooth performance across Android and iOS. - Integrated Firebase services (Authentication, Firestore, Cloud Messaging, Storage) to deliver secure backend functionality. - Implemented REST API integrations for seamless data exchange with backend servers and third-party services. - Built responsive, user-friendly UIs following Material Design and Cupertino guidelines, improving user experience and retention. - Collaborated with a team using Git, Bitbucket for version control. - Optimized app performance and state management using Riverpod, reducing UI latency and improving efficiency. - Debugged and resolved issues using Flutter DevTools, ensuring high app stability and reducing crash rates. - Contributed to app release cycles (Google Play Store, Apple App Store), including versioning, build generation, and deployment.	
Flutter Developer Intern <i>Luminar TechnoHub</i>	Jun 2024 – Aug 2024 Ernakulam, India
Automotive Technician <i>Popular Vehicles And Services Limited</i>	Sep 2018 – Sep 2021 Ernakulam, India
- Worked as an automobile mechanic while independently learning mobile app development. - Developed a demo Android training app (Java) that fetched technician training videos and tests via REST API, embedded unlisted YouTube videos, and linked Google Forms for assessments. - Implemented a feature to view previous training videos, helping technicians revisit learning materials. - Work was featured in Kuttukaran Group’s newsletter, recognizing innovation in technician training support.	

EDUCATION

Flutter Developer Training <i>Luminar Technolab</i>	Jan 2024 – May 2024 Ernakulam, India
Bachelor of Computer Applications (BCA) <i>Indira Gandhi National Open University (IGNOU)</i>	Jan 2020 – Dec 2022 Ernakulam, India

PERSONAL LIVE PROJECTS

G-Form Tools (Released on May 2021) <i>Java</i>	Google Play Store 
- Built a link generation tool that auto-fills Google Forms, reducing repetitive manual input and saving users significant time. - Achieved 230,000+ installs on Google Play Store with a 3.9★ rating and 400+ user reviews. - Implemented data persistence and automation features to enhance usability across repeated submissions.	
StatusLab : HD Status Maker (Released on May 2023) <i>Flutter, Dart, GetX</i>	Google Play Store 
A video compression tool developed using Flutter and powered by GetX for state management.	

- Achieved **84,000+ installs** on Google Play Store with a **3.9★ rating** and **240+ reviews**.
- Integrated **Firebase Crashlytics** for real-time bug tracking and analytics to improve app stability.
- Implemented efficient **state management with GetX**, ensuring responsive UI and reduced latency.
- Created a **custom internal Flutter plugin** to integrate **InMobi Choice CMP (Consent Management Platform)** for GDPR-compliant user consent handling.

Personal Portfolio Website

Open

Flutter Web, Dart, Custom CSS, Animations

- Developed a **responsive personal portfolio website** using **Flutter Web**, optimized for desktop and mobile screens.
- Implemented a **custom CSS loader** to enhance user experience during Flutter engine initialization.
- Designed **smooth route transition animations** and an **animated custom mouse pointer**.
- Utilized **MouseRegion** for dynamic hover effects and interactive animations, improving overall UI interactivity.
- Built with a **modern, clean, and responsive UI** to showcase projects and professional experience.

OTHER PROJECTS

Effective Sales (and Client Variants: Engaged Intro, ESM In-Store, The Art of Expressions, POS360)

Flutter, Dart, REST APIs, Riverpod

- Developed **field force management and sales automation app** with features like **real-time GPS tracking, attendance, route compliance, and task management**.
- Built an **in-app messaging system** similar to WhatsApp, supporting **media sharing, emoji keyboard, and audio message recording**.
- Designed and implemented a **dynamic questionnaire engine** that renders multi-level forms from backend (.NET API) data, allows multiple responses, collects input, and submits responses in real time.
- Delivered **5 customized variants** of the application for different clients, ensuring scalability and feature consistency.

Savour – Recipe Discovery & Social Cooking App

Flutter, Dart, REST APIs, Riverpod

- Developed a **cross-platform recipe and menu discovery app** enabling users to explore, share, and manage recipes and curated menus.
- Integrated with a **Python FastAPI backend** to fetch recipes, menus, and user-specific recommendations.
- Implemented **GoRouter with deep linking**, enabling seamless navigation and direct access to recipes, menus, and shared content from external links.
- Designed **responsive, animated UIs** for smooth navigation, including recipe steps, menus, and personalized feeds.
- Collaborated with backend team to ensure seamless **API integration** and consistent data handling.

V1 Weight and Balance

Flutter, Dart, Sqflite, REST APIs

- Developed a **weight and balance calculator app** for one of the **largest airlines in South Africa**.
- Built **data input and visualization modules** to calculate and plot weight & balance graphs dynamically.
- Implemented **local data persistence** using **Sqflite**, allowing offline access to saved calculations.
- Integrated **REST API updates** to fetch and refresh calculation parameters from the backend, ensuring accuracy and up-to-date data.
- Delivered a **reliable and efficient tool** to assist airline crew in performing critical pre-flight calculations.
